

Month-End Close Report

January - March 2026 | entities: BE01, BE02, US01 | dataset: clean

APPROVED FOR CLOSE

All critical controls passed. The close may be reported.
close_status: PASS report_allowed: true

Executive summary

Measure	Value
Invoices processed	60
Matching exceptions	0
Intercompany pairs	20
Net intercompany position (EUR)	0.00
Controls passed	38 of 38

Control summary

Group	Controls	Pass	Warning	Fail	Error
CVG	4	4	0	0	0
FXC	6	6	0	0	0
ICO	10	10	0	0	0
MAT	12	12	0	0	0
SRC	6	6	0	0	0

By control family

Family	Controls	Pass	Not passing
COMPLETENESS	13	13	0
RECONCILIATION	21	21	0
SOURCE_ACCURACY	4	4	0

Failed controls

None. Every critical control passed.

Warnings

None.

Invoice matching

Measure	Value
Source invoice rows	60
Source payment rows	60
Result rows (invoices + orphan payment groups)	60
Invoices matched	60
Exceptions	0
Matched invoice value (EUR)	449,761.74
Matched invoice value (USD)	217,493.43

Rows by match status

Status	Rows
MATCHED	60

Matching exceptions

None. Every invoice matched its purchase order and payment.

Intercompany recharges

Measure	Value
Shared costs processed	10
Intercompany entries	40
Intercompany pairs	20
Receivables (EUR)	182,096.16
Payables (EUR)	182,096.16
Net position (EUR, expected 0.00)	0.00
Pairs eliminating within tolerance	20

Position by entity

Entity	Entries	Receivable (EUR)	Payable (EUR)	Net (EUR)
BE01	14	62,170.08	60,628.68	1,541.40
BE02	12	48,401.70	55,556.97	-7,155.27
US01	14	71,524.38	65,910.51	5,613.87

Intercompany exceptions

None. Every pair carries both sides and eliminates to zero.

FX source accuracy

Intercompany elimination cannot detect an incorrect FX rate: both sides of a recharge use the same rate, so receivables and payables still agree. The source-accuracy controls below compare the supplied rates with an independent reference and re-perform each booked amount at that reference.

Month	Supplied rate	Reference rate	Difference	Verdict
2026-01	1.0800	1.0800	+0.0000	OK
2026-02	1.0900	1.0900	+0.0000	OK
2026-03	1.0700	1.0700	+0.0000	OK

FX controls

Control	Severity	Status	Finding
FXC-01 FX coverage	CRITICAL	PASS	A rate is available for every month in scope.
FXC-02 No duplicate FX months	CRITICAL	PASS	Each month appears exactly once.
FXC-03 FX rate matches reference	CRITICAL	PASS	Every supplied rate matches the reference.
FXC-04 No unexpected FX months	WARNING	PASS	The FX file carries no months the reference does not.
FXC-05 Recharge re-performance at reference rates	CRITICAL	PASS	Every entry re-performs to the reference within tolerance.
FXC-06 FX rate plausibility	CRITICAL	PASS	Every rate is inside the plausible band.
